How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	-5.01%
Annual return (after deductions for charges but before tax)	-3.26%
Market index annual return (reflects no deduction for charges and tax)	-4.07%

The market index annual return is a composite index, calculated using 40% MSCI World Index net div (GBP) and 60% Bloomberg Barclays Global Aggregate Index (GBP hedged). To the extent that imputation credits are available, they are included in the market index.

The market index changed on 21 December 2018 from a composite index, calculated using 40% MSCI World Index and 60% Bloomberg Barclays Global Aggregate Index (both in pound sterling) to a composite index, calculated using 40% MSCI World Index net div (GBP) and 60% Bloomberg Barclays Global Aggregate Index (GBP hedged) as it is a more appropriate index in terms of assessing movements in the market in relation to the returns from the assets in which the Fund invests.

See the Statement of Investment Policy and Objectives (**SIPO**) for details of the Fund's benchmark asset allocation and the asset class indices.

Additional information about the market index is available in the 'Market Index' document on the offer register at disclose-register.companiesoffice.govt.nz (search for 'IVCM (NZ) PIE Superannuation Fund').
